EDUCATION

Virtual University of Pakistan

B.S. in Computer Science (alongside full-time role at NETSOL)

Lahore, Pakistan

2021 – 2026

Virtual University of Pakistan

Associate Degree in Computer Science

Lahore, Pakistan

2018 – 2021

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, C++, SQL, HTML/CSS

Frontend: React, Next.js, Vue, Nuxt, Tailwind CSS, React Native

Backend & Data: Node.js, FastAPI, Flask, REST, JWT/OAuth, Stripe, PostgreSQL, MongoDB, Supabase

AI & DevOps: LLM APIs, RAG Pipelines, LangChain, pgvector, Docker, Kubernetes, GitHub Actions (CI/CD), Vercel

WORK EXPERIENCE

NETSOL Technologies

Oct 2015 – Present

Promoted twice across a 10-year tenure: Intern → Software Engineer → Senior Full Stack Developer Lahore, Pakistan

Senior Full Stack Developer

Jan 2019 – Present

- Led full-stack development of enterprise web applications from Figma handoff to deployment using React, Vue.js, Nuxt.js, FastAPI, and Node.js, with secure PostgreSQL backend services and JWT/OAuth.
- Reduced development time by 25% during NETSOL's corporate website rebuild by migrating to Nuxt.js with server-side rendering and a reusable component architecture.
- Cut deployment time by 67% (~45 to ~15 minutes) by designing CI/CD pipelines with GitHub Actions, Docker, and Vercel, eliminating manual release steps.
- Improved frontend performance via optimized state management, code splitting, lazy loading, and data caching; delivered a Malaysia-based clinic management system within a distributed team.

Software Engineer / Front-End Developer

Jun 2016 – Dec 2018

- Implemented JWT/OAuth authentication, role-based access control, and REST API integrations across enterprise applications; built reusable Vue.js components that reduced duplicated code.
- Developed backend APIs with FastAPI, Flask, and Node.js, delivering secure Stripe payment workflows for end-to-end full-stack features.

Internship Trainee

Oct 2015 – May 2016

- Joined through NETSOL's disability-inclusion hiring program; transitioned from a design and marketing internship into a decade-long engineering career while completing a CS degree in parallel.

SELECTED PROJECTS

AI Chatbot Platform | FastAPI, PostgreSQL (pgvector), LangChain, LLM APIs

Jul. 2025 – Sep. 2025

- Architected a multi-agent, tool-aware chatbot platform enabling enterprises to query internal knowledge bases conversationally, with multi-tenant isolation keeping each organization's documents secure.
- Built a Retrieval-Augmented Generation (RAG) pipeline with document chunking, pgvector embeddings, and semantic search, grounding LLM responses in source documents to reduce hallucinated answers.

AuraAI – AI Wellness Companion | Next.js 16, Google Gemini, Stripe

Jan. 2026 – Apr. 2026

- Built a production-ready AI wellness companion with real-time streaming conversations via the Google Gemini API, secure authentication, and persistent conversation history.
- Integrated Stripe subscription billing end to end, covering plan management, payment webhooks, and gated premium features.

Live Gold & Silver Prices | Next.js 16, Sanity CMS

Nov. 2025 – Jan. 2026

- Developed a production web app delivering live gold and silver prices across six international markets, with full Arabic RTL localization for Middle Eastern audiences.
- Used Incremental Static Regeneration (ISR) for near real-time price updates with static-site performance, and Sanity CMS for independent non-technical content editing.

Eden Avenue Management | Next.js, Prisma, PostgreSQL

May 2025 – Jun. 2025

- Developed a full-stack property management platform digitizing tenant-landlord workflows, with role-based access control, maintenance request tracking, and offline-capable PWA support for field staff.

CERTIFICATIONS

AI Engineering Program – NETSOL Technologies: 3-month intensive covering LLM integration, RAG, and agent workflows (2026)
