SUMMARY

Front-End Developer & Software Engineer at NETSOL Technologies (since 2015). Started in design/marketing and transitioned into web development. Build responsive web applications using React, Vue, Nuxt, and Tailwind, integrating REST APIs, JWT/OAuth authentication, and CI/CD via GitHub Actions. BSc Computer Science (in progress, expected 2026). Built 15+ personal projects in full-stack development and AI. Hard of hearing; joined NETSOL through a disability inclusion program.

PROFESSIONAL EXPERIENCE

Software Engineer / Front-End Developer

Jun 2024 – Present

NETSOL Technologies, Lahore, Pakistan

- Built fast, web apps with React, Vue and Nuxt. I focused on scalability and clean architecture.
- I created dynamic Vue.js features and converting landing pages. This increased engagement by 20% and conversions by around 15%.
- I integrated APIs. I secured applications with JWT and OAuth authentication.
- I set up GitHub Actions CI/CD. I deployed to Vercel. This cut deployment time by 20%. It also removed steps.
- I collaborated on teams using JIRA. We reduced sprint bottlenecks by, around 30%.

Design & Marketing

2015 – 2024

NETSOL Technologies, Lahore, Pakistan

- I joined NETSOL in 2015 through a disability employment program while studying, marking the start of my career. I began in design, creating logos and HTML email templates and running campaigns via Mailchimp, then moved into web development and joined the engineering team.
